Areas of action

- _ Create a channel for the transfer of the Catalan medical technology sector's priority areas of research to the European Commission
- _ Keep the sector informed of the different opportunities for taking part in European calls for tender
- _ To secure strategic positions for leading Catalan scientists that will allow them to influence the definition of the EC work programme
- _ To increase the success of the Catalan medical technology sector in R&D Framework Programme future calls.

Goals

- 1_ To make the Catalan medical technology sector a driving force in research and clinical transfer within Europe.
- 2_ To defend the Catalan medical technology sector interests before the European Commission.
- 3_ To maximise the Catalan medical technology sector's impact on the definition of European R&D+i framework programmes .
- 4_ To increase and foster the medical technology sector's participation, particularly of SMEs, in European projects.
- 5_ To create a working network that facilitates interaction between Catalan R&D stakeholders and the Catalan medical technology sector.

Strategy

- _ The Connect-EU Group for Medical Technologies aims to set up a network of Catalan R&D+i stakeholders able to influence future European framework programmes, both in terms of attracting funds and in the design of publicly tendered programmes in line with the the Catalan medical technology sector's interests and strategies.
